Education

BSc in Software Engineering

Shahjalal University of Science and Technology, Sylhet, Bangladesh

January 2023–May 2027 (Expected)

CGPA: 3.42/4.00

Competitive Programming

- Ranked 46th overall and among the top 10 teams from Bangladesh at the **ICPC Asia West Continental Final 2025–2026**.
- Placed 22nd at the 2025 ICPC Dhaka Regional.
- Placed 22nd at the 2025 Metropolitan University IUPC.
- Codeforces rating: 1423 (Specialist).
- AtCoder rating: 546.
- CodeChef rating: 1246 (3 ★).
- Placed 2,971st in Round 2 of Meta Hacker Cup 2025.
- Placed 3,636th in Round 2 of Meta Hacker Cup 2024.
- Solved 1000+ algorithmic problems across multiple online judges.
- Served as one of the problem setters for the 2025 SUST Intra SWE Programming Contest.

Technical Skills

Programming Languages: C++, C, Java, JavaScript, Python

Frontend: React, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs

Databases: MySQL, MongoDB

Testing and Automation: Postman, JUnit, Selenium

Tools and Platforms: Git, GitHub, Docker, Hadoop

Projects

Task Manager

Express.js, MongoDB, Mongoose, JWT, bcrypt

- Built a RESTful task management API with Express.js, MongoDB, and Mongoose using a maintainable layered architecture, supporting task creation, retrieval, updates, and deletion.
- Secured per-user task access with JWT authentication and bcrypt password hashing.

IICT Library Management System

React, Vite, Express.js, Prisma, MariaDB, Node.js

- Built and deployed a role-based library platform with a React/Vite frontend and an Express/Prisma/MariaDB backend for public, student, teacher, and admin users.
- Designed a responsive, role-aware interface with tailored navigation and workflows for each user type.
- Developed REST APIs with authentication, validation, error handling, and database migrations; documented the architecture, API, QA process, and Render deployment.

Doctor Appointment System

Java, Android, Gradle, Mobile Development

- Developed an Android application in Java and Gradle for viewing doctor availability, booking appointments, and managing medical records.
- Applied a clean architecture and intuitive navigation to keep the codebase maintainable and workflows user-friendly.
- Implemented appointment booking, editing, and record-retrieval workflows to improve patient-doctor coordination.
